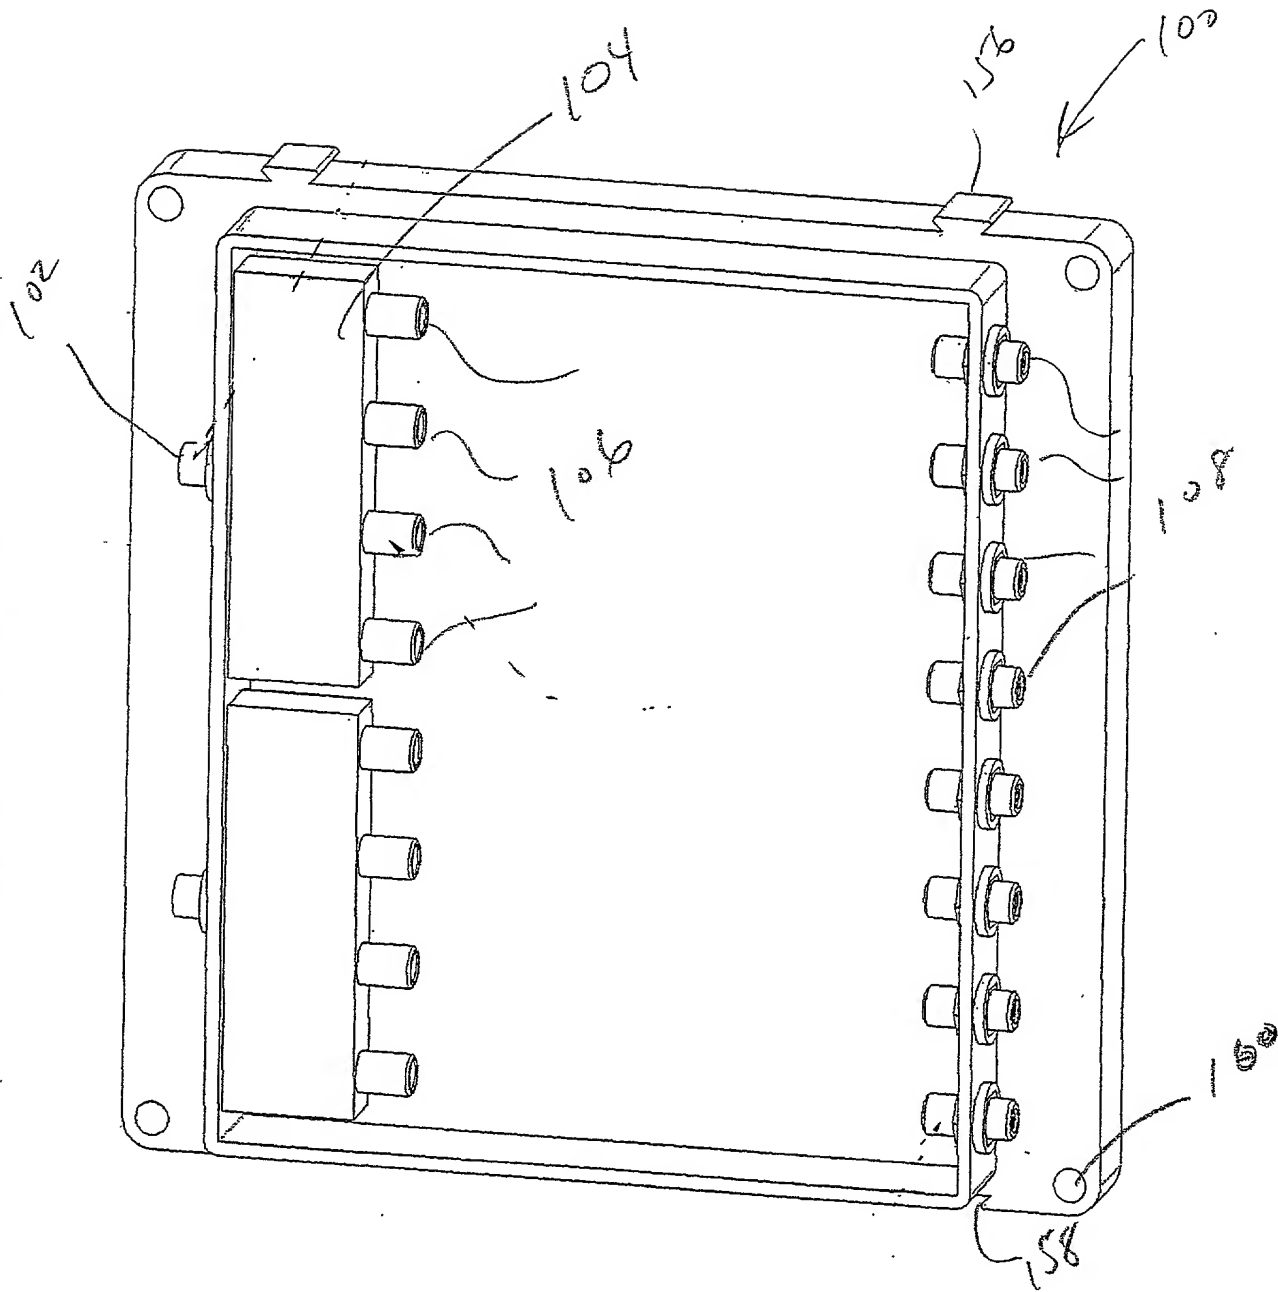

Figure 6

This diagram shows the front panel assembly in an exploded perspective view. It includes a main front panel (10) with a central rectangular opening. A top flange (11) is shown above the panel, and a bottom flange (12) is shown below it. A central rectangular component (13) is positioned between the two flanges. The panel features a series of vertical slots along its top and bottom edges, and a series of horizontal slots along its left and right edges. The central opening is defined by a series of vertical and horizontal lines, suggesting a grid or a specific internal structure. The flanges and the central component are shown with various mounting points and slots, indicating how they fit together to form the front panel assembly.
